RDM EC6000i Gen2 Check Imager

The RDM EC6000i check imager offers industry leading MICR and image technology in a compact design with a small footprint. The EC6000i Gen2 series is setting the standard for check imaging and also delivers check conversion and check guarantee capabilities. Harbortouch is now offering this check imager completely free of charge!

FEATURES

- Check guarantee reduces risk from accepting NSF or bounced checks, eliminating losses and fees from bounced checks practically overnight
- Check conversion automatically deposits checks into your bank account, eliminating the need to take trips to the bank
- Delivers the industry's highest MICR read accuracy using RDM's patented technology
- Crisp, clear binary images exceed industry standards
- Low administrative returns due to MICR misreads and rejects
- Increased internal image storage capacity
- Simple and functional usability
