

Petroleum Pay-at-Pump Solutions

Customers who utilize pay-at-pump services are seeking convenience, speed and security when making electronic payments. Harbortouch can provide an impressive petroleum program with full pay-at-pump functionality, high-speed processing and advanced security for any gas station or convenience store.

COMPREHENSIVE PAYMENT OPTIONS

Harbortouch can equip your business with a complete payment system. In addition to full Visa, MasterCard, American Express, Discover, JCB and Debit acceptance, we can enable you to accept Wright Express and Voyager Fleet cards as well as many private label Fleet gas cards. Offering multiple payment options will keep your customers coming back again and again.

ADVANCED SECURITY

Harbortouch provides a variety of security options in order to protect your business from fraudulent transactions. Our Address Verification Service (AVS) reduces fraud by requiring customers to know and enter their credit card billing zip codes. We also offer Velocity Checking, which limits the number of times a customer can use the same payment card at the pump within a designated period of time. If either of these security measures is activated, the cardholder will be referred inside.

TAKE ADVANTAGE OF PAY-AT-PUMP SERVICES TODAY!

If you offer pay-at-pump services or accept Fleet Cards at your business, Harbortouch can provide you with a payment option that will save you money and accommodate all of your customers' transaction needs. Contact Harbortouch today to learn more about our advanced petroleum program with high-speed authorizations.
